Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt of request for extension of time (granted) and information disclosure statement filed 2-13-02 is acknowledged.

Continued Prosecution Application

1. The request filed on 2-13-02 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09553,969 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Berg et al (4,837,285; hereafter '285).

'285 discloses resorbable wound compositions comprising gel particles to that are sufficiently open to stimulate cellular ingrowth and are applied with a syringe (abstract; C 2, L 49-64; C 3, L 42-C 4, L 5; C 4, L 55-56; C 5, L 10-68; examples; claims). See MPEP 2113 for rejection of Product-by-process claims under 35 U.S.C. 102. In the instant case, the product of the instant claim is a hydrogel in particle

Art Unit: 1615

form and the product of '285 is in bead form. There does not appear to be any difference between a bead and a particle and the Patent Office is not equipped to manufacture products by the various processes put before it and then obtain prior art products and make physical comparisons therewith.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Berg et al (4,837,285; hereafter '285).

'285 discloses resorbable wound compositions comprising gel particles to that are sufficiently open to stimulate cellular ingrowth and are applied with a syringe (abstract; C 2, L 49-64; C 3, L 42-C 4, L 5; C 4, L 55-56; C 5, L 10-68; examples; claims). See MPEP 2113 for rejection of Product-by-process claims under 35 U.S.C. 102. In the instant case, the product of the instant claim is a hydrogel in particle form resulting from mechanical disruption and the product of '285 is in bead form resulting from spray drying. Furthermore, page 10, lines 4-27 of the instant specification admits that there is no criticality between mechanical disruption and spray drying. The motivation for choosing between the two being a matter of convenience in that one may be more easily accomplished whether by accessibility or price. Therefore, the burden is

Art Unit: 1615

shifted to applicant to come forward with evidence establishing an unobvious difference between the claimed product and the prior art product.

Response to Arguments

6. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Todd D Ware whose telephone number is (703) 305-1700. The examiner can normally be reached on 8:30 AM - 5 PM.
